#### **LISTING OF CLAIMS:**

1. (Currently amended) A display device comprising:  
a Fresnel lens having a plurality of bumps **directly** affixed to or formed on an output [[side]] **surface** of the Fresnel lens;  
a lens system to project an image;  
a substantially planar back plate mirror to reflect the image to the Fresnel lens, the back plate mirror substantially parallel to the Fresnel lens; and  
a substantially planar intermediate mirror to reflect the image projected by the lens system to the back plate mirror, the intermediate mirror being substantially parallel to the back plate mirror, wherein the intermediate mirror is substantially perpendicular to the optic axis of the lens system.
2. (Original) The display device of claim 1, wherein at least one of the plurality of bumps has a different size than another one of the plurality of bumps.
3. (Original) The display device of claim 2, wherein each of the plurality of bumps has a different size.
4. (Currently amended) The display device of claim 1, wherein the plurality of bumps is randomly distributed over the output [[side]] **surface** of the Fresnel lens.
5. (Original) The display device of claim 1, wherein at least one of the plurality of bumps has a different shape than another one of the plurality of the plurality of bumps.
